EDUCATION

University of Southern California Master of Science in Computer Science, GPA: 3.57/4 Thakur College of Engineering and Technology Bachelor of Engineering in Computer Engineering, GPA: 9.67/10	Los Angeles, California AUG 2024 - MAY 2026 Mumbai, Maharashtra JUL 2020 - JUN 2024
--	--

EXPERIENCE

USC Information Technology Services (ITS) IT Support Associate	Los Angeles, California Jan 2025 - Present
- Provided Tier 1/2 technical support across classrooms and computer labs, resolving hardware, AV, and network issues while maintaining system uptime. - Configured and maintained PoE-based Crestron control systems, applying firmware updates and performing diagnostics that reduced control failures by 35%. - Assisted with deployment of system updates, imaging, and patch management; collaborated with ITS engineers to roll out security patches across university-managed devices.	
GovRecover Software Engineering Intern	Miami, Florida Mar 2025 – Aug 2025
- Collaborated directly with the co-founder to scale GovRecover’s backend infrastructure and bring automated unclaimed property support services to Texas state systems - Developed modular ETL pipelines in TypeScript and PostgreSQL to parse and standardize incoming data across fixed-width and CSV formats, enabling seamless ingestion from 20+ states - Deployed and monitored services on Linode using Coolify for streamlined DevOps, ensuring uptime and maintainability across self-hosted deployments.	
Mahindra Group Software Developer Intern	Mumbai, India Mar 2024 – May 2024
- Deployed immersive technician training platform using Unity3D + AWS Lambda; tested across VR Oculus, desktop, and mobile environments to ensure consistent experience and stability. - Integrated GPT-3 NLP models converting SOPs into interactive modules, reducing technician training from three days to 20 hours - Worked directly with hardware Oculus Quest and backend services to test, debug, and validate interaction logic, latency performance, and content accuracy	

PROJECTS

Energy Sense ESP32, C++, Python, AWS, Machine Learning, IoT Sensors	
- Developed a smart energy optimization system prototype using ESP32 microcontroller (C++) and AWS-based Machine learning models, reducing energy consumption by 25% across 10+ appliances - Integrated 4+ sensors (temperature, humidity, motion, light) to collect real-time environmental data, improving energy usage predictions by 30% through accurate appliance control recommendations	
Smart Email Responder Workflow Gemini 2.0, Google Cloud Functions, Python	
- Engineered automated email classification and response system using Gemini 2.0 API integrated with Google Cloud Functions; accurately classifies and responds to 300+ emails daily, reducing manual triage workload by 50% - Developed scalable serverless functions on Google Cloud, enabling real-time email processing, generating context-aware responses, and scheduling automated meetings, maintaining SLA compliance - Improved internal communication efficiency by automating meeting invitations and follow-up notifications based on email content, significantly boosting team productivity and client interaction quality	
Demo: link	
Medical Chatbot Fine-Tuning Llama-3-8B, Unsloth LoRA, PyTorch	
- Fine-tuned Llama-3-8B using Unsloth LoRA on 25k medical dialogues and optimized deployment via Ollama, producing a lightweight, locally hosted chatbot suitable for real-time use in clinical environments - Designed a privacy-preserving inference pipeline enabling secure, offline handling of sensitive queries while maintaining strong contextual relevance and response coherence under resource-constrained conditions	
Demo: link	

SKILLS

- Data Structures, Algorithms, Object-Oriented Design, Agile Development, Test Driven Development**
- RESTful APIs, DevOps, Design Patterns, System Design, SOLID Principles**
- Programming Languages:** Python, JavaScript, TypeScript, C++, Java
- Frontend Technologies:** Angular, React, HTML, CSS
- Backend Technologies:** Node.js, Flask, Express.js, Django
- Testing & Automation:** Selenium, Postman, Cypress
- Storage Technologies:** SQL, NoSQL, PostgreSQL, MySQL, MongoDB, DynamoDB, Redis
- Other Technologies:** Git, Docker, Kubernetes, Grafana, AWS, Azure

LEADERSHIP AND ACHIEVEMENTS

- Technical Head, CSI: Oversaw technical operations for events, managing participant data for 200+ attendees, ensuring accurate reporting and analytics.
